- Melissa D'Agostino, Cecil Community College (MILEX Webmaster)
- Sarah Gilchrist, American University (MILEX Treasurer)
- Stephen "Mike" Kiel, University of Baltimore
- Mariette Largess, University of Maryland Global Campus (MILEX Secretary)
- Loretta Spangler, McDaniel College (MILEX Assistant Treasurer)
- Lisa Sweeney, Towson University (MILEX Registrar)
- Brandy Whitlock, Anne Arundel Community College (MILEX Chair)

Agenda

1:00 PM – 2:30 PM: Keynote + Q+A

2:30 PM – 2:45 PM: Break

2:45 PM – 3:45 PM: Workshop of Ideas for Using/
Addressing AI in IL Instruction

3:45 PM – 4:00 PM: Wrap-Up

Keynote Speakers

Sandy Hervieux is the Head of the Nahum Gelber Law Library at McGill University. Her research interests include reference services, information literacy, and the impact of artificial intelligence on user services.

Amanda Wheatley is a Liaison Librarian at McGill University. Her research interests include artificial intelligence, user experience, and entrepreneurship.

AI with Boolean

QUESTION FOR ChatGPT: Create a Boolean search string that uses truncation and phrase searching for the research question "According to the latest research, what are the most common symptoms of 'long COVID' for Black women?"

ANSWER: ("long COVID" OR "post-acute sequelae of SARS-CoV-2 infection" OR "PASC") AND ("Black women" OR African-American women" OR "African descent") AND ("symptoms" OR "manifestations" OR "clinical presentation") AND "latest research"

AI + The Latest Research

QUESTION FOR ChatGPT: According to the latest research, what are the most common symptoms of “long COVID” for Black women?

ANSWER: As of my last knowledge update in January 2022, I don't have access to specific information on the latest research conducted after that date. To find the most current information on the common symptoms of "long COVID" for Black women, I recommend conducting a search on a medical research database like PubMed or consulting the websites of reputable health organizations. You can use the search string provided in the previous response as a starting point for your search and then review the most recent studies and articles on this topic to obtain the latest findings. Additionally, consulting with healthcare professionals and specialists in the field may also provide valuable insights.
